#### **GLOSSARY**

- AERIAL APPLICATION Aerial application in agriculture consists of those activities that involve the discharge of materials from aircraft in flight and a miscellaneous collection of minor activities that do not require the distribution of any materials.
- AIR CARRIER The term "Air Carrier", as used in this report, refers to aircraft operators certificated by the Federal Aviation Administration for the transportation by air of persons, property, and mail.
- AIR CARRIER OPERATIONS Aircraft operating under certificates of public convenience and necessity, issued by the CAB, authorizing the performance of scheduled air transportation over specified routes and a limited amount of nonscheduled operations.
- AIRCRAFT MANUFACTURERS Establishments primarily engaged in manufacturing or assembling complete aircraft such as airplanes, gliders, dirigibles, and balloons, and which may also manufacture aircraft parts and auxiliary equipment.
- AIR TAXI OPERATIONS Air taxi operations and commuter air carrier operations (takeoffs and landings) carrying passengers, mail or cargo for revenue in accordance with FAR Part 135 or Part 121.
- AMATEUR-BUILT AIRCRAFT Aircraft built from purchased kits, drawings, etc., and aircraft individually designed and built.
- BALLOON A lighter-than-air aircraft that is not engine driven.
- BUSINESS TRANSPORTATION Any use of an aircraft not for compensation or hire by an individual for the purposes of transportation required by a business in which he is engaged.
- CERTIFICATED PILOT A person who holds a certificate issued by FAA, which qualifies him to operate aircraft within the limitations prescribed on the certificate.
- CERTIFICATED ROUTE AIR CARRIER An air carrier holding a Certificate of Public Convenience and Necessity issued by the CAB to conduct scheduled services over specified routes. Certain nonscheduled or charter operations may also be conducted by these carriers.
- COMMERCIAL OPERATOR One of a class of air carriers operating on a *private* for-hire basis, as distinguished from a public or common air carrier, holding a commercial operator certificate, issued by the Administrator of the Federal Aviation Administration (pursuant to Part 45 of the Civil Air Regulations) authorizing it to operate aircraft in air commerce for the transportation of goods or passengers for compensation or hire.

- DIRIGIBLE A lighter-than-air aircraft, engine propelled, with an inward metal frame which maintains its shape.
- EXECUTIVE TRANSPORTATION Any use of an aircraft by a corporation, company or other organization for the purposes of transporting its employees and/or property not for compensation or hire and employing professional pilots for the operation of the aircraft.
- FAA Federal Aviation Administration.
- FIXED-WING AIRCRAFT Aircraft having wings fixed to the airplane fuselage and outspread in flight, i.e., nonrotating wings.
- GENERAL AVIATION AIRCRAFT All civil aircraft except those classified as air carrier.
- GENERAL AVIATION FLYING All civil flying except that classified as air carrier.
- HELICOPTER See ROTORCRAFT.
- HELICOPTER CARRIERS Domestic certificated route air carriers employing helicopter aircraft for their primary operations.
- HELIPORT An area of land, water, or any structure approved by the Administrator for the landing and takeoff of helicopters.
- HORSEPOWER The measure of power for piston engines.
- INDUSTRIAL/SPECIAL Any use of an aircraft for specialized work allied with industrial activity; excluding transportation and aerial application. (Examples: pipe line patrol; survey; advertising; photography; helicopter hoist; etc.)
- INSTRUCTIONAL FLYING Any use of an aircraft for the purposes of formal instruction with the flight instructor aboard, or with the maneuvers on the particular flight(s) specified by the flight instructor.
- PISTON-POWERED AIRCRAFT An aircraft operated by engines in which pistons moving back and forth work upon a crank shaft or other device to create rotational movement.
- PERSONAL AND PLEASURE FLYING Any use of an aircraft for personal purposes not associated with business or profession, and not for hire. This includes maintenance of pilot proficiency.
- REGISTERED AIRCRAFT Aircraft registered with FAA.

ROTORCRAFT — A heavier-than-air aircraft that derives lift from one or more revolving "wings", or blades, engine-driven about an approximately vertical axis. A rotorcraft does not have conventional fixed wings, nor in any but some earlier models is it provided with a conventional propeller, forward thrust and lift being furnished by the rotor. The powered rotor blades also enable the machine to hover, and to land and take off vertically.

SCHEDULED AIR LINE - See CERTIFICATED ROUTE AIR CARRIER.

- SCHEDULED OPERATION Transport operations performed over an air carrier's certificated route, based on published flight schedules, including extra sections.
- SUPPLEMENTAL AIR CARRIER One of a class of air carriers now holding certificates of public convenience and necessity issued by the Civil Aeronautics Board, authorizing them to perform passenger and cargo charter services supplementing the scheduled service of the certificated route air carriers. Both international and domestic charter operations are for a temporary period. The authority of supplemental air carriers to engage in military charters is of an indefinite period. In addition, they can perform on an emergency basis, as may be authorized by the CAB, scheduled operations including the transportation of individually ticketed passengers and individually waybilled cargo.
- TURBINE-POWERED AIRCRAFT Includes aircraft with either turbojet, turbofan, turboprop, or turboshaft engines.
- TURBOJET Aircraft operated by jet engines incorporating a turbine-driven air compressor to take in and compress the air for the combustion of fuel, the gases of combustion (or the heated air) being used both to rotate the turbine and to create a thrust-producing jet.
- TURBOPROP Aircraft in which the main propulsive force is supplied by a gas turbine driven conventional propeller. Additional propulsive force may be supplied from the discharge turbine exhaust gas.
- U.S. CIVIL AIRCRAFT FLEET All aircraft under U.S. registry exclusive of the Military.

#### **APPENDIX**

NOTE: Entries made on the original will appear on the second copy without using carbon paper. The second copy of this form should be retained by the aircraft owner as evidence of submission. Shaded areas are for FAA use only.

## INSTRUCTIONS FOR COMPLETING AND SIGNING THE FORM ON THE REVERSE.

For your convenience this form has been preprinted with all available information in FAA records as of December 31. Where the preprinted information is correct, no entry is needed. Where the information is incurrect or out-of-date insert the correct information in the space provided. Where no information is preprinted please enter the information requested in the space provided.

Part 1. The purpose of Part 1 is to maintain the Civil Aircraft Registry. It is used to verify continued eligibility for aircraft registration. Refusal or failure to submit this part may be cause for suspension or revocation of the holder's Certificate of Aircraft Registration and loss of the aircraft registration number.

Part 2. The purpose of Part 2 is to gather general aviation aircraft fleet statistical information. It will be used to develop statistics for FAA publications and analytical studies. Individual aircraft information is available on magnetic type at cost. There is no penalty for failure to complete this part of the form.

### GUIDELINES FOR COMPLETING SIGNATURE BLOCKS 17 AND 18.

- If this aircraft is still eligible for registration, and you wish to continue its registration, sign Block 18 and enter the date in Block 20. Follow the guidelines for signature below.
- 2 If the aircraft is now ineligible for registration in your name or you wish to cancel its registration for other reasons, complete and sign Block 17 and enter the date in Block 20, following the guidelines for signature below.

#### GUIDELINES FOR SIGNATURE

- 1. INDIVIDUAL OWNER. An individual owner whose name appears in Block 12 must sign his name.
- 2 PARTNERSHIP. Any general partner may sign for the partnership but must show his title "partner."
- CORPORATIONS. Any corporate officer or person holding a managerial position with the corporation may sign for the corporation. He must also indicate the title of his office below his signature.
- 4. CO-OWNER. Unless cancellation of registration is requested, any co-owner may sign certifying citizenship and ownership for all co-owners. If cancellation is requested, the signature of each co-owner must appear on this form or on an attached sheet.
- 5. GOVERNMENT. Any authorized person may sign showing his title.

IMPORTANT NOTE — AIRWORTHINESS DIRECTIVES may not be received by the aircraft lessee/operator, unless blocks 57 through 61 are completed by the registered owner, as requested.

After you complete and sign the form send the original (first copy) to:

DEPARTMENT OF TRANSPORTATION FAA AIRCRAFT REGISTRY AAC-259 P.O. BOX 26045 OKLAHOMA CITY, OKLAHOMA 73126

THIS IS AN ANNUAL REPORTING FORM ONLY AND IS NOT TO BE SUBMITTED WITH OTHER AIRCRAFT REGISTRATION DOCUMENTS OR MONEY.
